

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Application of

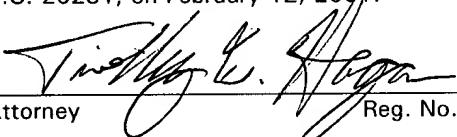

Applicants : David R. Hembree, Salman Akram, and Derek Gochnour
Serial No. : 09/510,828
Filed : February 23, 2000
Title : A SPRING ELEMENT FOR USE IN AN APPARATUS FOR ATTACHING
TO A SEMICONDUCTOR AND METHOD OF ATTACHING
Docket : MIO 0020 VA (97-0198.02)
Examiner : J. Mitchell
Art Unit : 2822

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to:
Assistant Commissioner for Patents, Washington,
D.C. 20231, on February 12, 2001.

Attorney

Reg. No. 29,001

RESPONSE TO RESTRICTION/ELECTION REQUIREMENT

This paper is being filed in response to the Office Action mailed February 7, 2001. In that Action, the Examiner required election of one of 32 different "species" of the invention as identified by the Examiner (Groups 1-32). As best can be understood, applicants elect the species of the invention identified by the Examiner as Group 1, a spring element including an elastomeric member and a conductive member.

Applicants believe that this elected species is readable on claims 29-71 and 73, all of the claims in the application, because all claims recite, in one form or another, a spring element which includes an elastic or elastomeric member and a conductive member. Thus, applicants agree with the Examiner's observation that "Group 1 is generic to groups 2-32."
